

REAR LOAD CONTAINERS

TRASH CONTAINERS TAKE A LOT OF ABUSE BOTH INSIDE AND OUT. THEY HAVE TO BE TOUGH ENOUGH TO HOLD ANY TYPE OF WASTE AND DURABLE ENOUGH TO STAND UP TO THE ABUSE OF THE ELEMENTS. I.E.S REAR LOAD CONTAINERS ARE CONSTRUCTED FROM HEAVY GAUGE STEEL AND PROVIDE A LOW COST AND CLEAN ALTERNATIVE TO GARBAGE DISPOSAL. THE (1YARD) AND (2YARD) CONTAINERS ARE BOTH CONSTRUCTED FROM ("ONE PIECE" 12 GAUGE STEEL) WHICH ELIMINATES HORIZONTAL WELDS THAT CAN RUST AND LEAK. THE (3YARD) THRU (6YARD) CONTAINERS ARE MADE WITH (12 GAUGE STEEL) SIDES AND (10 GAUGE STEEL) BOTTOMS. THE (1YARD) AND (2YARD) CONTAINERS ARE SHIPPED WITH HIGH QUALITY CASTERS.
